

- minifig()
- subfigures()

Variables:

- sfigure

0.1.1 minifig

Show rule function

Put `#show: minifig` at the top of your document and it should work fine

0.1.1.1 Parameters

```
minifig(doc)
```

0.1.2 subfigures

Equivalent to the `figure` command with less arguments

- caption: The caption for the whole figure
- cols: Number of columns to split the subfigure up into
- subfigs: All the subfigures to display. Use Section 0.1.3 for these

0.1.2.1 Parameters

```
subfigures(
  caption,
  cols,
  ..subfigs
)
```

0.1.3 sfigure

A singular subfigure

This uses some custom numbering so make sure to use this for your subfigures
